

“Emergency”

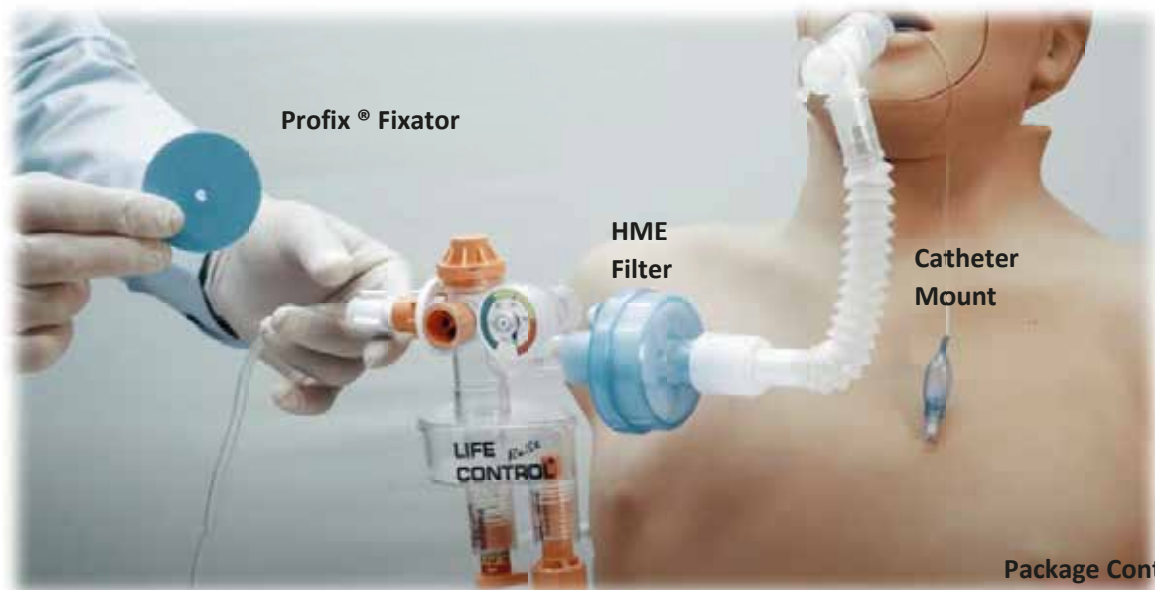

Life Control[®] ReSt Disposable Mechanical Ventilator

Features

- ▶ Disposable.
- ▶ 50% -100% oxygen concentration can be selected with the FiO₂ Mixer.
- ▶ Safely used in MRI and all magnetic fields.
- ▶ Body fixation feature (Profix).
- ▶ Compatible with all lung structures.
- ▶ Complies with ISO 10651-5 Standard.
- ▶ No risk of Barotrauma.
- ▶ Applied by users trained in CPR (Cardiopulmonary Resuscitation).
- ▶ Should be used in patients over 10 kg.
- ▶ Cardiac massage can be performed during ventilation.
- ▶ Light and safe, PEEP sensitive.

Connections

Package Content

Usage Areas

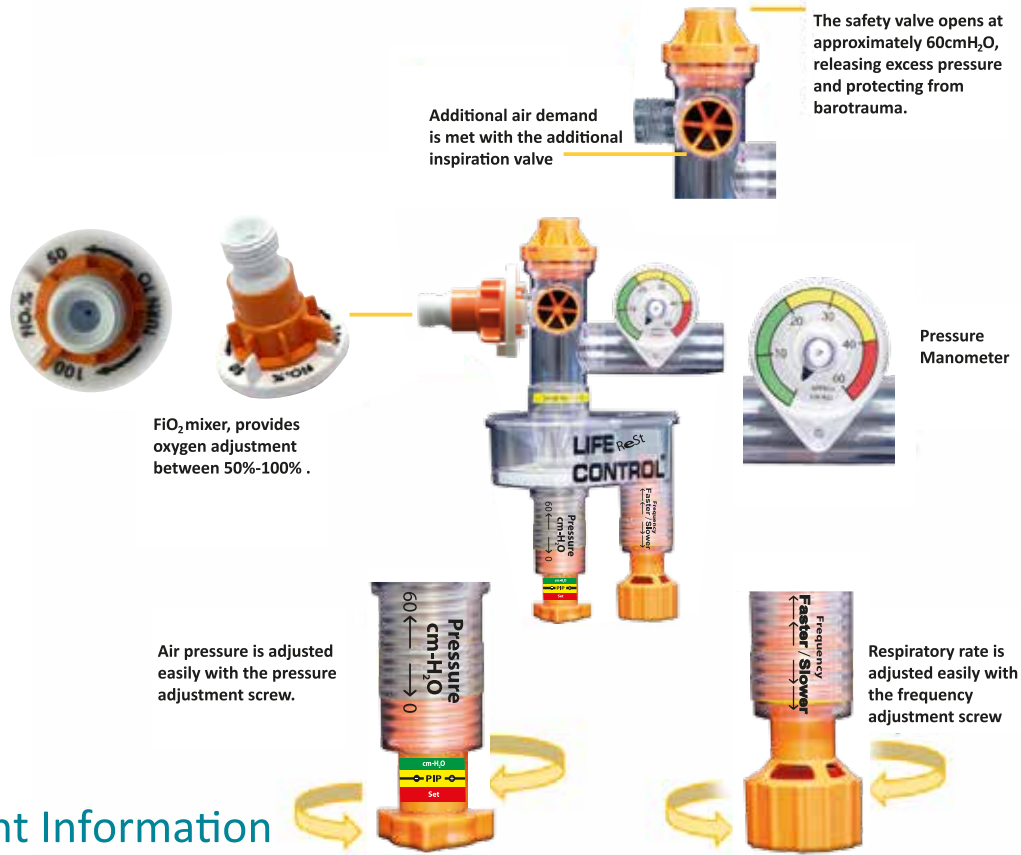

- ▶ Air, Land and Sea Ambulances,
- ▶ Emergency Units,
- ▶ Intensive Care Units,
- ▶ Anesthesia Units,
- ▶ In-hospital and out-of-hospital patient transport,
- ▶ Military Units,
- ▶ Hotels and Holiday Villages,
- ▶ Open Area Conditions

Safety of use in MRI devices in accordance with the
ASTM F2052-15,
ASTM F2213-17
standards

Life Control[®] ReSt Disposable Mechanical Ventilator

Functions

Important Information

- ▶ *Life Control[®] should be used in emergency services, intensive care, field and normal use "UNDER THE CONTINUOUS SUPERVISION OF QUALIFIED PERSONS" in accordance with the ISO 10651-5 standard*
- ▶ *Electrical supply (battery, accumulator..etc) is not required to operate Life Control[®]. Pressurized oxygen supply is sufficient for operation.*
- ▶ *Life Control[®] works effectively with air sources that provide a flow in the range of 8-40 L/min and a pressure value in the range of 2.5 – 5.5 bar.*
- ▶ *HME filter has 99.997% retention and it is disposable.*
- ▶ *If damage occurs to the filter due to vomit or secretion, the filter should be removed and replaced within maximum 20 seconds.*
