

hygiene

Dear customer;

We have made all innovations in quality and product development stages in line with the feedback and suggestions of our valuable users. We would like to take this opportunity to thank our esteemed Turkish doctors for their contributions; hope to receive your support, suggestions and criticism with sensitivity.

About 40 years of experience in the sector as a manufacturer with the highest quality, TMT Tibbi Medikal Malz. San. A.Ş. has gained an important share in the international market as well as in our country in a short time. We are proud to have gained the rightful trust in nearly 100 countries all over the world with the **egemen**[®] brand.

Societies that want to live well without working, getting tired and producing are doomed to lose their dignity first, then their freedom and then their independence and future.

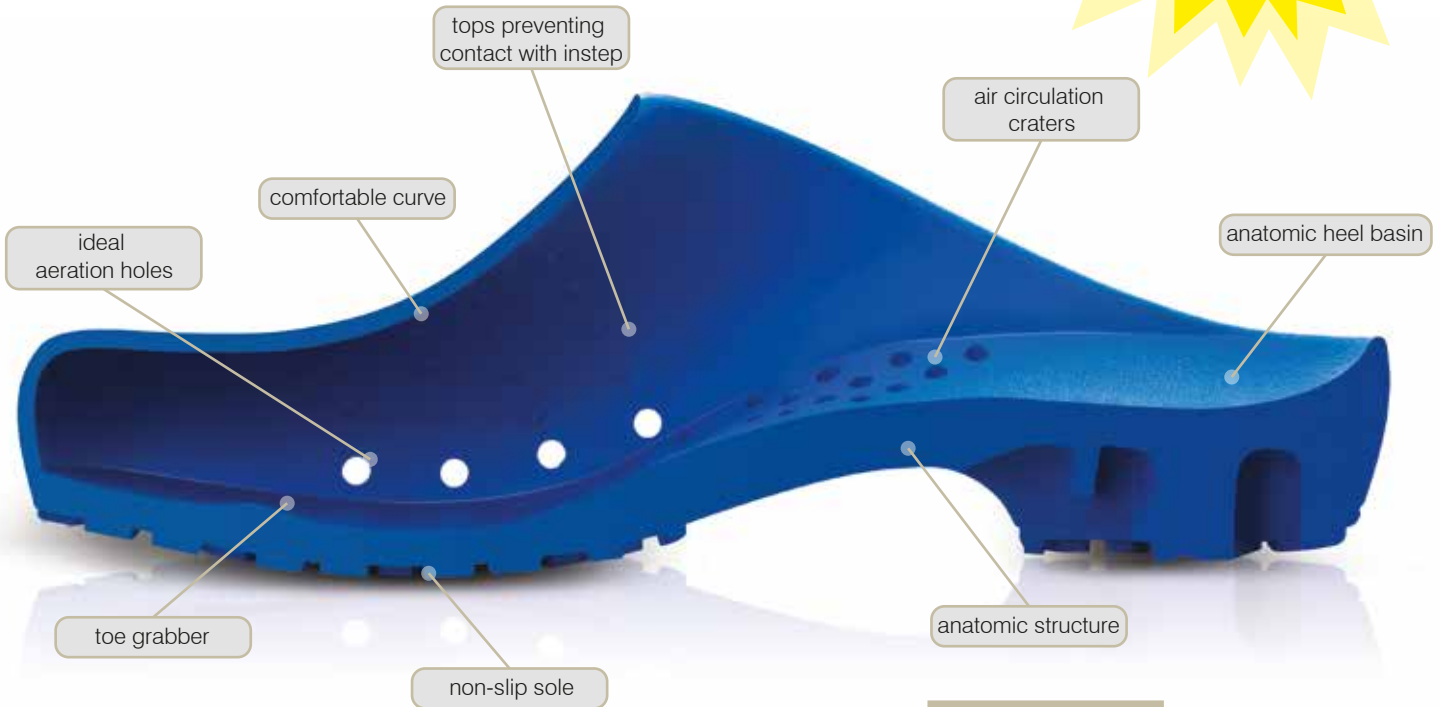

Contents

- 1 _____ **JASMINE**[®] Cleanroom Clogs
- 2 _____ **UNITEM**[®] Cleanroom Clogs
- 3 _____ **THREE STEP** Re-Usable Cleanroom Mats

Cleanroom Clogs

JASMINE®

The inner surface of the product designed considering your feet's comfort is anatomical. Smooth surface and reciprocal holes made with the purpose of ventilating feet provide day long comfort. Thanks to its special conical design, the fluids spilt on the slippers will be prevented to go in.

re-usable clean room mats

THREE STEP

area of usage

- Operating Theatre
- Intensive Care Units
- Class 100 / 10.000 / 100.000 Clean Rooms
- Electronics Industry "Electronic Chip, Sensitive Circuit, Integrated Circuit, Wireless Industry"
- Food Industry
- Medical Industry "Invasive Medical Device Manufacturing Fields"
- Dialysis Centers
- Nanotechnology Labs

specifications

Coefficient of Friction	:2,02 (ASTM C 1028) 4,05 TORTUS
Heavy Weights Resistance	:84,5 kg/cm ²
Heat Resistance	:0 - 50°C
Toxicity	:Non-Toxic
X-Rays / Gamma Rays	:No Effect
Anti-static Feature	:Eliminates static

features

- Three Step contamination preventive mats have high friction power.
- Surface is constantly sticky and can be cleaned with all kind of detergents.
- Stickiness is re-established on cleaned surface and this procedure can be repeated for 5 years.
- Even surface captures particles with electromagnetic traction; this procedure is known as the "VAN DER WAALS" theory. When smooth surface meets rough surface, it draws 98% - 100% of particles on rough surface (minimum 3 steps)
- Anti-static. Protects employees from damages of static electricity.
- Antibacterial. Prevents bacterial procreation and dissemination. Tested on (PSEUDONOMAS AERUGONASA and STAPHYLOCORCUS AUREUS)
- Three Step Mats are supposed to be used at the entrance of clean rooms and operating theaters with the purpose to prevent the entrance of particles into these areas.
- Highly economic according to daily cost calculations.
