

TRANSFORAMINAL BLUNT TIP SYMPATHETIC NERVE BLOCK NEEDLE

INNOVATIVE AND UNIQUE ASPECTS OF THE TRANSFORAMINAL NEEDLE;

✓ This invention has been designed for the purpose of transforaminal epidural injection. It is important in terms of performing injection with needle specific to certain nerve and nerve root targets, increasing the success rate in pain treatment, ensuring patient satisfaction and reducing costs.

- ✓ Having 2 injection holes instead of 1 for the first time
- ✓ Being the first transforaminal needle design visible under ultrasonography
- ✓ Reducing unnecessary radiation exposure of both the practitioner (operator) and the patient because of its ability to be applied with ultrasonography

TRANSFORAMINAL BLUNT TIP SYMPATHETIC NERVE BLOCK KIT

✓ 25 G hypodermic needle for local anesthesia

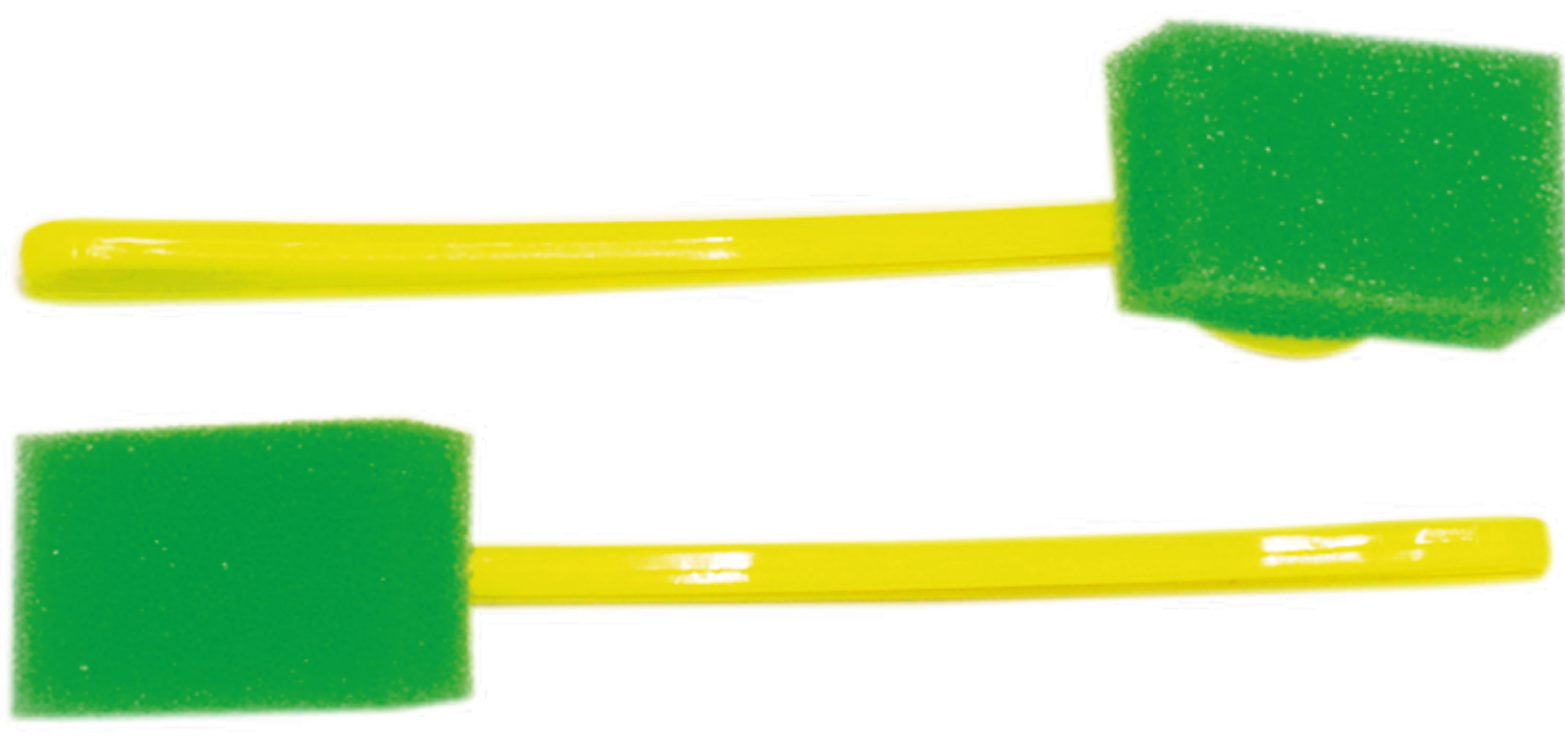

✓ Filtered Aspiration Cannula
It enables filtration of the anesthetic fluid aspirated from flacon or ampule (For Glass Particles)

Waste Needle Box

Adhesive Surgical Drape for the Operation Area

Antiseptic Dyeing Sponge

Surgical Towel
